### THE SUCRERIES.

THE EXPERTS SECOND REPORT

At 3.15 pm. yesterday the experts' second report on the situation of the Sucresies Company was read to a large and interested and denoge. The three experts, Sir William Will-cooks, Pourneron Bey, and M. Sampsolo, were present, as were Harari Pash, the Hun. A. J. Davey, M. Naus, and many well-known logal and financial personalities. Judge Tuck opened the sitting and, the clerk of the court, M. Zigliars, read the lengthy report of the streets for the next hour.

### EGYPTIAN SHARE MARKET

(FROM OUR FINANCIAL CORRESPONDENT).

London, October 18.

The Dominating Factor.

"If you will tell me what is going to be the future of the Money market, then I am prepared to give a forecast of the price of stocks and shares in the immediate feture." This is the reply one has reseived throughout the week from most of the leading financiers when discussing the movement of stocks and share. It would soom for the moment that the money market entirely dominates the situation, even the Deleases expoures and the animosity which is being displayed by the German Trees has had prosciedly no effect on Stock Krobange values, as the incident is not looked upon in so serious a light as some of the less responsible newspapes would have us believe.

### The Bank Reserve.

The Bank Reserve.

Whits no alteration was made in the Bank rate yeaterday, still in Lombard-street discount rates remained firm—the result, no doubt, of the poor showing of the Bank resure. There was a considerable sequity for gold for Paris, but as no transactions took place no prices transpired. The Bank reserve now amounts to only £20,585,000, which is a decline of nearly £600,000 since our last. Over £500,000 of gold which was shipped on account of the Indian paper currency reserve is, we learn, to be landed in Egypt, which will mean a similar amount of depletion to the Bank of Egglant's stock.

Consols.

depletion to the Bank of England's stock.

Consols have been a more or less weak market in consequence of the money situation during the past week. They close today at 88 ½. The bungling of the sale of a large block of Iodian Threes, due to the diffinalties of a firm of jobbers in the American market, and also the fact that a well-known firm of brokers were reported to be under the necessity of liquidating on a heavy scale to meet the differences of clients, brought the price of these down from 95½ to 95½. This had it selfset on other similar securities, which were dail allysateday, but love off with a slightly better tone to day.

Foreign Markets.

### Foreign Markets.

Foreign Markets.
In the fireign market, Russian bonds have given way somewhat and are 1 down since our last report. They close to-day at 23 1. Japanese stocks have been sailing on a fairly even keel all the week, and show practically no difference in price. They are quoted to-sight at 100½. A fair desamed has put up the price of Egyptian Market generally at £. There seems to be a good deal of attention given to the Egyptian market generally at the present time. National and Agricultural Bank shares show little change from our last and leave off at 21½ and 5½ respectively.

Say Reconstruction.

little change from our last and leave off at 274 and 97 respectively.

Say Reconstruction.

It will interest your readers to know what happened on Teavily at the meeting of the shareholders of the Say Refinery Company. The result of this meeting was that, although at one time the 1,200 shareholders showed a good deal of disastisfaction at the ignorance displayed oy the directors as to the transactions of M. Consier, still in the end they almost unanimously yoted for the directors' proposal for reconstruction. The scheme of reorganization they agreed upon was as follows. The capital, at present, 28,250,000 france in 76,500 shares of 500 france each, is to be redoced to 15,000,000 by making the nominal amount of each of the present shares 2001 instead of 500f. Presh capital is to be obtained by the issue of 114,750 new 200f. shares, which will bring the total capital up to the original amount. The new shares will be issued at a premium of 40f. 30f. of which will be placed to the reserve and 10f. set saids for the expenses and guarantoeing of the issue. The shares will be prayable immediately, and will be entitled to partake in the profile from October 1st.

Although several of the shareholders would have liked to have bad a full discussion on the acts of the late managing director, this was thought instruked the several present and was adjourned and have liked to have bad a full discussion on the acts of the late managing director, this was thought instruked by the present market and was adjourned and Norman market market.

Ratie.

### Rails.

Rails.

In Home rails, prices were more or less affected by the duliness of Cossols, and consequently, notwithstanding the favorable trade advices and trails of the last weak, they lessed advices and trails of the last weak, they lessed of lower than they would otherwise have done. The American market is still in a watting attitude, and is no doubt affected by the conservative report of Mr. Vandrailip, of the National City Bank, who advises oaction. Greied Trunks did not respond to the favorable statement as to prospects at the meeting of the company youtdray, and Canadian Pacifics were 12 lower on the weak at 1763.

Minion Market.

In the mining market prices have oscillated during the week, and there is very little to report concerning them. Rhodosias house interested in the Banktes have kept these actedy at round about 2.5. The Egyptian section has managed to shake itself clear of the weight of Africana, and there was a distinctly better tendency throughout. "The seventh year's business, which began the lat of Ostobes, 1904, promised to be collect. The sugar campaign had been very obtained by the profits amounting to 215,000.

April last the fall in the price of angar was attlined, but we did not aspect the fall to briosally interfers with the not profits already juried. At most, the consequence of the fall is eager might have decreased our profit-iring the last half-year. According to the formation supplied to us by our management, we had longly our ranger at a reasonable price, and these prorabars were practically versed by the sales which we laid made in sticipation. Not only so, but a large portion the sugar for 1905 was sold in advance, he general condition of the stocks and the ill in prices did not lead—us to expect any promisdrable manging in prices. Such was a position as it was represented to your land of the management, when suddenly, like thunder-clap, the news of M. Gronier's icide came.

M. CRONIER'S IRREGULARITIES.

Particulars of the German scheme for a canal to unite the Gaspian Sea with the Persian Gell are fornished by the Paris "Belair." It is intended, of course, to counterbalance the British plan prepared by Sir William Willocks, whose idea is to reader the Tigris navigable as far as Diarbelit, where it would meet a railway line from Smyrna. The German plan, "elaborated by Herr Weachtor, is to join Baghāda, the highest point of navigability of the Tigris, to Bervil on the Caspian See, by concreting the Djirolla, a tributary of the Tigris, with the Kisil Usen, a river flowing into the Caspian. Too this it will be necessary to construct a wast reservoir in the mountains dividing the two view basins, in order to provide water for the Kisil Usen, a time of the contract of puring the contract of t M. CRONIER'S IRREGULARITIES.

"We have already, pointed out that MM. Henri Bay and Co. had continued to work side by side with us with M. Say as the ma seer. When M. Say diel our general manager, M. The credit of the firm of Henri Say and Co. what he conduct of the same of Henri Say and Co. when the conduct of the firm of the continued of the same should be sufficiently within the last few months in the credit of the firm? and I need only point to the fact that the leading Paris banks made no difficulty within the last few months in disconning close upon a million stelling of bills signed by M. Cronier as liquida'or of Mears. Henri Say and Co. This in itself will prove to you that even the great Paris banks made was convinced of the salvancy of Mears. Henri Say and Co.

In fact, we discovered that the company was deeply compromised as a result of M. Cronier's business methods. He had made heavy purchases in France and still beavier purchases, abread in the name of the company, thus making as liable. At first sight it would appear that the days of romanoe in connection with the Uganda Railway are ended. Not so many years ago we were entertained by stories (Gindelly guaranteed as true) of elephants clearing out the booking offices and of liens carrying away parangers from the carriages. Bees stong to death one undertunate black, and careless with their enconcolonably Jong necks. This last difficulty has been obvisted by raising the wires to saventeen feet above ground. The latest report, just issued as a White Paper, is of a tally difficunt character. It is a mass of figures, with the elaborate tables of mileage ron, court of working; average tonage, and, other matters which repel all but the railway expert or acroises shareholder. Yet if the average Briton could be induced to study the document—and the Uganda Railway is a

average Briton could be induced to study the document—and the Uganda Railway is a national asset in which all taxpayers are shareholders—he would find in it the tree romance; the wonder of a railway piercing to the least of Africa and boilt across deserts, forests, and mountains whose existence was scarcely dreamt of in the youth of men not yet old, proving at once an economic success.

THE NAW LAND OF PROMISE.
As andwished between the mass of figures
presented are some very pertinent observations
by thore quiet men who serve Britain so well
in the outposts of empire, it may not be superfluous to emphasise the points which an
attentive study of the return unkes clear.
The year 1904 5 is the first year of full and

uninterrupted traffic on the 584 miles of rails which link Mombasa to the Victoria Nyanza. When the year began it was estimated that there would be a deficit on the twolve months. working of £45,000 (the railway, it must be remembered was built for political reasons, and as a great blow to the slave trade, not on to general meeting tasks have cased organisates of this subscription and of the company be reconstructed and brought up to its original and present amount of \$8,25,00,00 famile by an increase of 22,95,00 famos by means of an insure of 12,95,00 famos object of proference abares are to be sisued with a premium of 40 famos, of which 30 famos shell be contributed towards the exponent and the granates of the new issen. There shares are to trank for proference shares are to asked from the state of the means of the profession of the and as a great now to the save trace, not on financial grounds), but the grees earnings, £141,000, greatly exceeded the amount an ticipated, with the result that the expected deficit of £45,000 was turned into an actual net profit of £2,600. This was due to two caus the rath of settlers and the rapid development of the study product of the country. Over a thore and white men came to the raw lead of promise, and it is gratifying to learn that all the sound traders and tarmers speak in high praise of the postivitations of the country. Already soons 2,000 tons of good, are handled monthly. The country produce is a sound traders and the second produced in the country from the country of the country produced to the lake threshously recomes trapped, but the railway iron. In the produced to the country produced to the co he rush of settlers and the rapid de or or the Congo Pres State. There is no possible doubt as to the sound "divideod" extening power of the railway, and its officials are keenly alive to the wisdom of satisfying the reonissance. AN ANDREE MEMORIAL.

Up to the present there has been no memorial to commemorate Andrée and his onfortnaste expedition. The Geographical Society
of Stockhelm, however, has taken the matter
in hand, and has commissioned Londberg, the
Swedish engraver, to make a large memorial
medial. The artist represents Andrée's halloon
rising from the ice. The explorer is lockirg
anxiously towards the North. A group of young
mer are applaading, while an old man looks
towards the horizon doubtfully. Below is the
data July 11, 1827. On the observes appases
the profile of Andrée, with his name and the
names of his companions, Sternberg and
Fraenkel. the wisdom of satisfying the requirements of their customers in every legitimate way. Rate-compare not unfavorably with those ruling in South A'rica to ment the needs of settlers, and

branch lines are contemplated.

BRITISH STEMABIIIP LINE WANTED.

There is, however, a reverse side to the pictore, foreibly portrayed by Mr. A. E. Creckshalt, the trails manager. The railway is prospering, and likely to proper still more, but the faiser fairs of British statemen is preventing England from resping the full advantage of that circumstance. At present almost all the produce brought down by the railway, as well as the beavy goods brought to it, are carried to and from Mombaas in foreign bettome. This important and expensive railway—the taxpayers have spent over £5,300,000 on it—built entirely by Great British, is feeding Pronch and German (chiefly German) atoam-thip lines. Surely it is time, as recommended by Mr. Evelyn Coeil's committee, that a subsidiesd British line be started. This is precisely one of the occasions when to leaves a job half done is the worst of follies. A line of British steamers which would serve all the ports in South-East Africa would regain much of the Zansibar and Mombaas trade now in the hands of foreign nations. Given favorable shipping facilities and rates, the development of British East Africa and Uganda would be much more rapid than it can otherwise be. The building of the Uganda railway has proved "asse Imperialism" if anything ever has; it is no evidence of rankity to withhold the subsidiary steamship service. BRITISH STEAMSHIP LINE WANTED

CONGO REGIME.

IS COLLAPSE IMMINENT?

in the

ing allogethor, when, it is suggested, Belgium would astume possession of the Free Stata. The propriation of the State is rapidly dwindling, coat-quest upon the conditions under which the 'administration' is worked.

The Rev. John H. Harris, attached to the Balolo Mission, on the Upper Congo, is now in Locdon, fresh from the scones of the horritic traffic in human flesh that marks the Free State. M. Harris, with a devoted hand of co-workers, has for the past seven years been working in the centre of the Abri district, where, perhaps, the worst of the tarrible attroittes have been prepartated. "There is no question about it," said Mr. Harris to a representative of "The Daily News" recently, "that the one solution to this fearful state of slafins is an international conference; until such is called nothing can be done. Diplomatio negotiations are absolutely of on avail. Take a case in point. Lord Landdowne was specifically promised by the Commission, that all "stinesses would be thoroughly prefered. As a matter of fact, various witnesses. Lave been obsseed, captured, and transported to other districts, and that by a any processes have been chased, captured, and sported to other districts, and that by a against whom the most fiendish outrages alleged.

transported to other districts, and that by a man against whom the most found in outrages were alleged.

"Again, in spite of Lord Landowna's proteats, the mission centres are boycotted by the natives, at the instipation of the concession-naires. The natives have been threatened with the direct p-nibment if they dear bring set food, either fissh meat or regentles; as a result we have, at great expense, to import timed foods in large quantities, because we have no means of obtaining other. "Would Belgium take over the Free State 1 No., I don't think so. In the first pines, I don't think it has any desire to. When offered it in 100, I don't think so. In the first pines, I don't think it has any desire to. When offered it in 101 die beforement in state that the matter aver consent to such a step. We had roughly handed over. Another thing is abeninely certain, England cannot and will not have the prevent regime carried on by the Government of another country."

The honorary scretary of the Congo Reform Association assense our contemprary in a telegram that the information given above is absolutely overest. The Congo State, he adds, is undoubtedly evacasting all the smaller poots in the Stately Pool districts, the pats in the Kwango and Cataract districts, together with these at Leikolela, Yambo, and Kwamou; with these at Leikolea, Yambo, and Kwamou; with the sea Leikolea, Yambo, and Kwamou

in the Kwango and Cataract districts, together with these at Lukolela, Yambu, and Kwamout, are being similarly dealt with Most of them are lower Congo posts, and the motive is ostensibly economy, coupled with shortage of

### GRECO-ROUMANIAN CONFLICT.

The following view of the right nationality to be given to the Kutzovlachs of Macedonia is of interest, as coming from one of themselves, and not from either Greek or Romanian (fficial sources. He says:—"The truth is that the majority of the Kutz wlachs in Macedonia reckon themselves

Greeks, and repel the suggestion of belonging to the Roumanians. Most of the Greek bands

Greeks, and repel the suggestion of belonging to the Roumanians. Most of the Greek bands in the Roumanians. Most of the Greek bands in the south are made up of Kutsvalesh. In the monstain villages our absphered speak besides Greek the Atomanian dialect, especially the women. But if they need to write they must use the Greek characters. But was, who live in the towas, have forgotten the dislect. "In Monastira, out of 3,600 Kutsvalseh-Greek families, only 31 have joined the Roumanian propagands, and so it is in other towas. The first thin is best above by the Committee. M. Douma was born a Greek, Now he is head of the Roumanian Fropagands, with 50 Turkin pourds a month. Hit liketenant is M. Sedroco, and Albasian, who was decoated at the expense of Bulguria, and then turned in M. Sedroco, and Elasaian, who was decoated at the expense of Bulguria, and then turned in Masdonias for the pay of £12 a week from Roumania."

A Board of Trade report above that the women of the United Kingdom have nearly twice as many chances of being married as have that sixter in other Enropean countries. In the ten years from 1838 to 1908 the marriage rate in the United Kingdom was from fourteen to sixteen per thousand, while in the rest of Europe the rate was between rown and eight per thousand. The birth and death rates are shown to be decreasing generally. In spite of the fewer births, the population of the United States has increased by 11,488,000 in eight years (notally by immigration), and that of the United States has increased the states of the state of the tendence of the United States has increased the United States has increased the state of the United States has increased the states of the Sta
